

EMBALMING WORKSHOP

PRESERVING THE PAST FOR THE FUTURE

16th - 17th AUGUST 08, Medical Faculty, UKM KL Campus

FUTURE DIRECTION

Many of the cadavers preserved do not meet proper standards thereby creating an unpleasant environment.

Often, the next of kin arrives late and it is mandatory to keep the body fresh. Often, the body has to be transported within or outside the country and proper certification is needed to avoid any inconvenience. Embalming procedures must be accompanied with proper certification which may be accepted by any agency. Proper knowledge of embalming and its certification may be immensely beneficial for any health care personnel.

OBJECTIVES

At the end of the workshop, the participants should;

- √Have increased awareness regarding the need to preserve biological material.
- √Have knowledge on proper embalming techniques.
- √Have 'hands-on' experience in embalming the body.
- √Possess knowledge on occupational hazards in embalming procedures.
- √Be able to set up an embalming laboratory.

TOPICS

- The Importance of Embalming
